Lead Automation Engineer & Automation Intern - JABIL | 2021-2023

Participation in automation and industrial system projects, supporting troubleshooting of hardware and software in automated environments.
Technologies: Java, SQL, C#.

MAIN ACADEMIC PROJECTS

Mechatronics Engineer

- **3rd Place – REDIJ - Red de Divulgadores Juveniles en Ciencia y Tecnología de Occidente (Latin America Level)**
  AppSport - Remote Workout Mobile Application
  Android application that allowed remote synchronization of daily workout routines (WOD) for gym members during the COVID-19 pandemic.
  Technologies: *Kotlin, XML, Android Studio*
- **Sale System**
  Application developed to manage product sales, including user registration and product availability control through a database.
  Technologies: *JavaScript, SQL.*
- **EcoFlow - Automated Irrigation System with Mobile App (Capstone Project)**
  Smart irrigation system controlled through an Android application, integrating environmental sensors, real-time weather data through APIs, and Bluetooth communication with the device.
  Technologies: *Kotlin, C++, XML, APIs, Bluetooth.*

Software Development Technologist

- **2nd Place – Expo INGETEC CETI - Río Santiago 2019-B**
  String Instrument Learning Mobile Application (Capstone Project)
  Android application designed to help users learn string instruments through interactive lessons, guitar simulation, scale tablatures, and a digital tuner based on sound frequency analysis.
  Technologies: *Java, XML, Android Studio.*
- ***Inventory Management System***
  Desktop application for product tracking, stock updates, and inventory movement registration.
  Technologies: *Java, SQL.*
- ***School Management System (Prototype)***
  Application developed to manage students, courses, and academic information through a database system.
  Technologies: *Java, SQL.*

TERCER LUGAR

Appsport – Invictus Command Crossfit

Alumno Arath Samir Mu

Asesor Omar Chávez

Escuela CETI Colomos

País México

Aplicación para poder realizar tu workout diario desde la comodidad de tu casa sin necesidad de ir a un gimnasio y/o Crossfit. Se actualiza el feed cada que el Coach sube la rutina a realizar diariamente.
